## LETTER OF RECOGNITION

The Canadian Society of Respiratory Therapists celebrates *Respiratory Therapy Week* annually to acknowledge the life-saving role respiratory therapists play in the health care field.

Every day in Calgary, respiratory therapists provide patients of all ages the best possible cardio-respiratory care in various environments including intensive care units, urgent care facilities, operating rooms and neonatal nurseries. This year more than ever, these tireless professionals have been on the frontlines, risking their own health to perform life sustaining procedures during a respiratory pandemic.

The City of Calgary recognizes October 25-31, 2020 as *Respiratory Therapy Week*, honouring the dedication and commitment of respiratory therapy professionals in our community.
